Pohang, Gyeongsangbuk-do 37673, South Korea

OBJECTIVE

Seeking a position where I can contribute to the development of robust and trustworthy LLM systems, with a focus on their integration into robotics and real-world applications. Passionate about building intelligent systems at the intersection of machine learning, trustworthy AI, and robotics.

EXPERIENCE

- Machine Learning Lab**  January 2024 - Present
Student Intern (Host: Sangdon Park) Pohang, South Korea
 - unlearning techniques for Large Language Models (LLMs) to effectively remove specific information from pre-trained models without retraining
 - Explored and implemented advanced selective generation methods to mitigate and control hallucinations in text generation, improving model reliability.
- Samsung electronics DS**  July 2023 - August 2023
Samsung Talent Internship Program at Device Solutions Suwon, South Korea
 - Developed an anomaly detection model for wafer data, significantly improving fault detection accuracy and process reliability.
- Bagelcode**  June 2024 - August 2024
Jr. Data Scientist Intern Seoul, South Korea
 - Scaled the MLOps pipeline to support new object types, ensuring robust deployment and lifecycle management of machine learning models.
 - Migrated to an incremental ETL architecture, reducing data processing costs and improving pipeline efficiency.

EDUCATION

- Pohang University Of Science and Technology, POSTECH** February 2021 - June 2025
Computer Science Pohang, South Korea
 - GPA: 3.70/4.30 (Major GPA: 3.77/4.30)
- KOREA SCIENCE ACADEMY OF KAIST, KSA** March 2018
Chemistry major Busan, South Korea

SKILLS

- **Programming Languages:** python, c, c++, verilog, SQL

HONORS AND AWARDS

- **Encouragement Award, 2021 Undergraduate Group Research Program** February 2022
POSTECH
- **Second Prize, 2023 TECHATHON: WAVE** February 2023
POSTECH

ADDITIONAL INFORMATION

Languages: Korean (Native), English (Proficiency level)
Interests: Machine Learning, Trustworthy AI, Robotics
